

There's more time to plan for changes to your rent

No public housing renter needs to pay more than 25% of their income in rent.

To help keep your rent right and ensure you only pay what you need to, please let us know of any changes to your household income or circumstances before November 2024.

Keep your income details up to date and apply for a rebate if you need to.

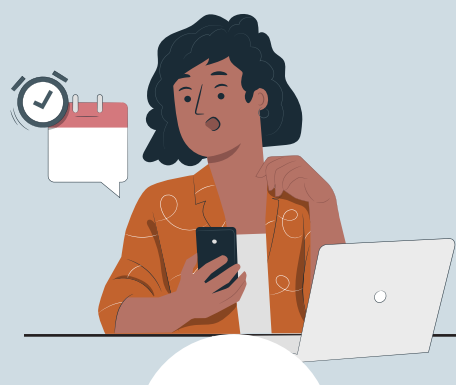

1

You will be advised of your updated rent in September.

2

Rent decreases will be applied in August and any increases in November.

3

What you pay in rent goes back into making public housing better.
